

EDUCATION

- **B.Tech CSE (AI/ML)**

UPES - Dehradun, India;

Jul 2023 – Present

CGPA: 8.7/10

SKILLS SUMMARY

- **Languages:**

Python, Java, C

• **AI/ML:**

PyTorch, TensorFlow, Scikit-Learn, XGBoost, LangChain

• **Tools:**

Git, GitHub Actions, n8n, MySQL

• **Relevant Coursework:**

Data Structures & Algorithms, Machine Learning, Deep Learning, NLP, Agentic AI

INTERNSHIPS

- **Whizoid Studio LLC**

Agentic AI Developer Intern

Sep 2025 – Nov 2025

Remote

◦ Designed and deployed autonomous **AI agent pipelines** using **n8n** to automate end-to-end identity verification workflows, reducing manual processing overhead.

◦ Developed **3+ multi-step reasoning agents** with self-directed decision-making via **API orchestration**, real-time data scraping, and conditional branching logic, cutting workflow resolution time by **40%**.

◦ Leveraged Python and n8n to ship 2+ production **agentic workflows** integrated with REST APIs.

• **Fookri Smart Play Solutions**

AI Developer Intern

Apr 2025 – Jun 2025

Remote

◦ Trained **XGBoost** and **scikit-learn** models on **920+ player records** across **1,100+ matches** using feature engineering and cross-validation, achieving **79.2%** player selection accuracy.

◦ Architected an **end-to-end ML pipeline** covering data preprocessing, hyperparameter tuning, and evaluation across **5+ model iterations**, improving sports analytics decision-making by **20%**.

◦ Generated **real-time player performance scores** powering live match predictions across **3+ cricket tournaments**.

PROJECTS

• **Song Embedding Model: Music Recommendation System**

Python, TensorFlow, Scikit-learn, Deep Learning, NLP

Jul 2025

◦ Architected a **neural network** generating **32-dimensional embeddings** from **113,999 tracks** with **3.9M trainable parameters**.

◦ Delivered a scalable content-based recommendation engine with high similarity accuracy, optimized for efficient inference.

• **Tapestria: Smart Library Management System**

Java (Spring Boot), Python, PyTorch, React.js, Full-Stack, ML Integration

May 2025

◦ Engineered role-based auth for **3+ user tiers**, real-time dashboards, and automated QR check-ins via **Spring Boot**, cutting check-in time by **60%**.

◦ Embedded a custom **PyTorch** recommendation model across a catalog of **10,000+ books**, improving user discovery engagement by **35%**.

• **Wanderer’s Odyssey: 2D Game Engine**

Core Java, DSA, Object-Oriented Programming

May 2025

◦ Engineered a modular tile-based engine applying advanced **DSA** for real-time collision detection and entity state management.

◦ Implemented a **60 FPS** gameplay loop supporting **10+ interactive object types** across varied tile environments.

HONORS AND AWARDS

• **Competitive Programming:** LeetCode Knight (Top 2.1%), Codeforces Specialist, CodeChef 4-Star

• **Hackathon:** Top 10 out of 300+ teams in “Hackathon 8.0” by UPES-CSI

• **Leadership:** Design Head, UPES ACM Chapter – led creative team across technical events and workshops.

• **Outreach:** Taught Math & English to 10+ students with mental disabilities at Nishakt Jan Society; built the NGO’s website.
